

**Weatherproof housing according to IP65 made of acrylic for  
LED illuminated display LWA-130-PL2**

Housing dimensions:	W646 x H200 x D65mm
wall thicknesses	Upper and side sections 6mm, rear wall 10mm
Seal:	Circumferential between the upper section and the rear wall

Assembly:

1. Remove the back protective foil and screw the rear wall incl. the pre-assembled V2A mounting plate onto the wall using the mounting materials included in delivery.
  2. The electrical feed line is positioned in the centre lower edge of the weatherproof housing, for which purpose the housing upper section features a recess for the cable gland. Guide the line from below behind the mounting plate and through one of the three holes there.
  3. Fasten the empty housing of the LWA-130-PL2 to be used onto the mounting plate with the enclosed screws M5x10, and install the LWA-130-PL2 in accordance with the instructions.
  4. Mount the upper section of the protective housing and tighten the 4 screws on the cover only approximately hand-tight (!) so that the thread in the rear wall is not overstrained.
- For cleaning purposes, only use a damp cloth and no aggressive cleaning agents.
